2023 Ebru Timtik Award Artwork by Mirta Kupferminc: Dignity and Rights

This work is an artist-object book made entirely by hand, which when unfolded, shows eyes of all kinds of people, and interspersed, the first article of the Universal Declaration of Human Rights written in Spanish, English, Kurdish and Turkish can be read. These last two languages were written by hand, to bring these words to the present through my own body, and transform my work into a claim for justice. The faces that look at us make us witnesses of what happened with Ebru Timtik giving us the responsibility of the action.

There is an expression that says: "Observe the law." With my work, I reverse the look through a mirror, and the whole society is observing each one of us.
